Mr. H. P. Gould,  
Bureau of Plant Industry, Wash.D.C.  
Dear Mr. Gould:

I thank you for your letter some time ago answering my question about some new fruits and berries in which I am interested as a grower and nurseryman.

I note in bulletins from your bureau and in answers to inquiries, you give reliable sources for the new varieties. I will appreciate very much if you will list us as a licensed nurseryman and dealer in the following new plants;- I am the exclusive licensee and propagator in the southeast of the new Acme Thornless Youngberry. I also have the Potomac, Erskine, St.Regis, Van Fleet, Black Cap, and Golden Queen raspberries. Blakemore, Bellmar, and Southland strawberries, and the Young Dewberry.

I am beginning with the Boysenberry, Brainard black berry, some of the new grapes from the N.Y.F.T. Assn. and Munson of Dennison Tex. The new Muscadine from the Ga.Ex.Sta. I have a few of the last varieties mentioned for sale now and hope to have a good supply next season.

I assure you fair and prompt dealing with any prospective customer that you may refer me to.

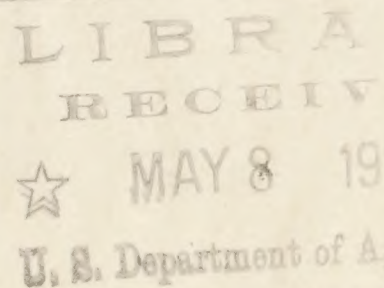

I will also always appreciate any suggestions or information about any new variety that you think will do well in our section.

With best wishes for the New Year.

Sincerely yours,

Homer A. Neal

P.S. We have just listened tonight to the President's message to Congress. This state seems to be fully 75 per cent for the President.
